

2024 PATHWAYS TO RECOVERY PROVIDER SUMMIT

Pathways to Recovery will provide healthcare providers with invaluable insights and tools to enhance their practice.

By participating in this event, providers will explore how substance use is impacting the Dayton area, discover valuable local grassroots organizations and community resources, and gain inspiration from personal recovery stories.

Additionally, providers will learn to identify signs of substance misuse, understand the vital role of peer support, and address common concerns about prescribing SUD medications.

This free summit offers a unique opportunity to engage with local experts and drive meaningful improvements in SUD care.

As a bonus, the time you spend attending the summit can be used towards fulfilling the new DEA training requirement. From those who are new to caring for patients with a substance use disorder to more experienced practitioners who are looking to expand their knowledge, this summit will offer something for everyone!

Thursday, Oct. 17
5:00 pm – 9:00 pm

Sinclair College,
Building 12
Charity Earley Room

Topics to be Explored

- **Recognizing signs of substance use or misuse and starting that conversation**
